

TREC 2013 Crowdsourcing Track Results

Group: (udel) University of Delaware

Run ID: udelJudge8

Task: Standard

Run type: Secondary

Description of run:

Fully automated run using 3 search engines on the pool of docs. Rules based on the position of a document for a topic in each of the 3 systems' ranking determines whether a document is relevant or not. Each udelJudgeX run has rules slightly different from the other udelJudgeY runs.

Results

Evaluation of crowd qrel **udelJudge8** for the Basic task of the TREC 2013 Crowdsourcing Track. The 10 topics for the basic task were randomly selected from the TREC 2013 web track ad-hoc task.

Topic	#Docs	GAP	τ_{AP} (APCorr)	RMSE
202	231	0.038	-0.017	0.251
214	305	0.646	0.226	0.134
216	387	0.593	-0.117	0.201
221	368	0.545	0.099	0.168
227	246	0.112	-0.255	0.467
230	172	0.284	-0.211	0.173
234	298	0.609	0.122	0.198
243	342	0.264	0.496	0.367
246	202	0.473	0.228	0.344
250	207	0.093	-0.207	0.240
all	2758	0.366	-0.185	0.175

Table 1: This table shows per-topic statistics and overall averages for the run udelJudge8. The metrics GAP, ERR@20, AP-correlation and RMSE are listed for each topic. Note that for row *all*, (i) GAP is the mean gap over all 10 topics, (ii) APCorr and RMSE depend on the ranking of runs induced by the mean ERR@20 for *all* the 10 topics.

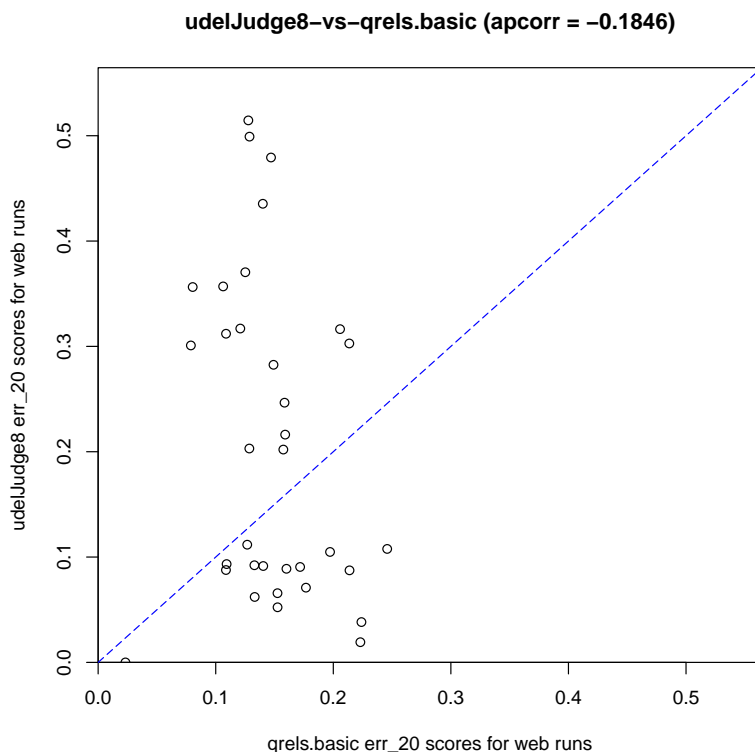

Figure 1: udelJudge8-basic-ERR@20 vs qrels.basic-ERR@20. *qrels.basic* is the TREC 2013 web track qrels reduced to topics 202, 214, 216, 221, 227, 230, 234, 243, 246, and 250.
