Complex Answer Retrieval Track results — (TREMA-UNH) University of New Hampshire

Run Description	
Run ID	UNH-bm25-rm
Topic type	Automatic
Run Features	Does not make use of any training data (unsupervised)
Ranking Pipeline	Section-level Lucene bm25 with rm3 query expansion. rm3 is an expansion method that (1) will identify an expansion distribution from the top 20 paragraphs according Lavrenko and Crofts Relevance Model (RM3) and (2) interpolate the expansion with the original query to get the bm25 retrieval score
