

CAsT Track, mixed initiative task results — (udel_fang) InfoLab at University of Delaware

Run Description	
Run ID:	mi_task_0822_1
Category:	automatic
Selective interaction method:	uses rules or heuristics (i.e. always ask on third turn)
Question selection method:	generates questions using a template-based approach (i.e. slot-filling)
Question selection context:	uses context from earlier conversation history; uses other context
Question ranking method:	does not rank questions (i.e. purely generative approach)
Data:	does not require external data
